

Helping you quantify your business decisions

by digging through your data.

DID YOU
KNOW?

The value of data surpassed the value of oil and gold.

Many corporations sit on piles of data not knowing how to derive the real value. They are missing out on opportunities right in front of their eyes.

20
YEARS

Florijn has helped large enterprises make the best decisions regarding their IT projects.

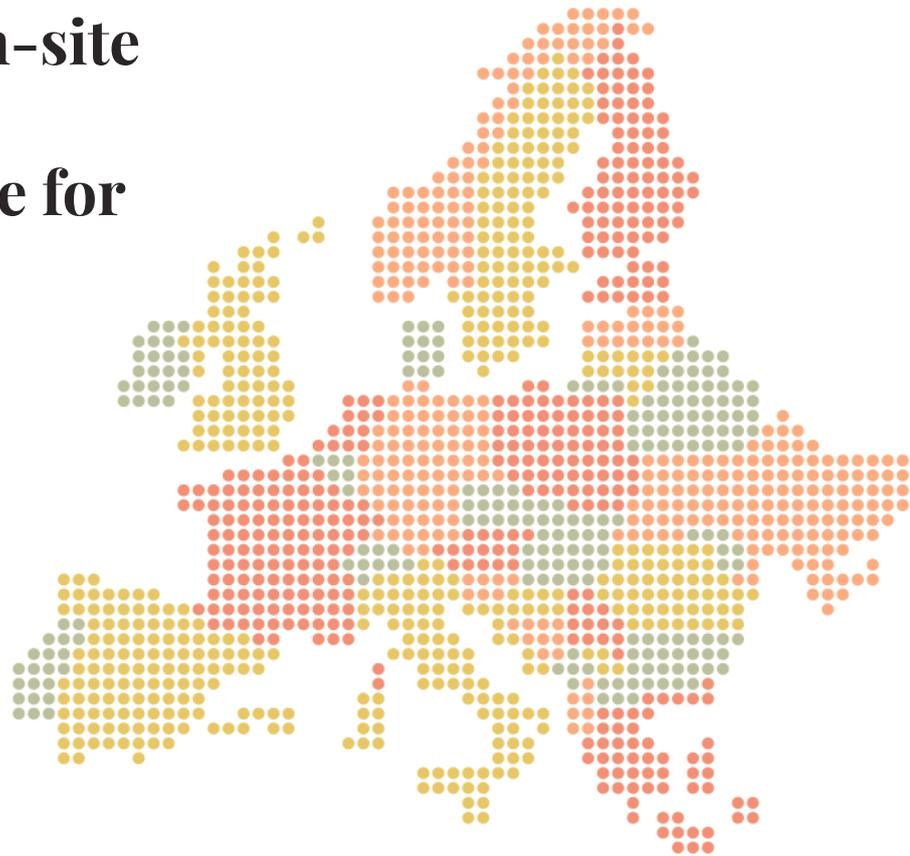

We simplify the complexity in recruitment and find the right person for the job. Our recruiters are data scientists themselves. Your guarantee for the right match.

We take the time to understand your business and make sure we thoroughly comprehend your desires. Once we are on the same page we can find the right person for the job quickly.

We thoroughly screen all our data experts; making sure we know the ins and outs of their ability.

Florijn was founded in 1998 and has 50 on-site experts working throughout Europe for global customers

Our near- and offshore tech teams with more than 40 highly trained IT experts have developed many advanced and scalable solutions.

The Strategist

Data Scientist

Our data scientists help you make the best business decisions. They present the importance of your data to you so that you can make the right strategic choices for your business.

The Explorer

Data Analyst

Our data analysts help you better understand your data. They provide you with a clearer image of your business.

The Builder

Data Engineer

Our data engineers help you collect data from multiple sources and develop the data infrastructure that your data scientists or analysts need to do their work.

Our data and cloud architects help design scalable data infrastructures so you have future proof solutions that scale with your business.

The Infrastructure Specialist

Data / Cloud Architect

Our quantitative analysts help you manage your financial risk. They have a deep understanding of capital and financial markets so you can make the best financial decisions.

The Financial Whiz-kid

Quantitative Analyst

Our machine learning engineers help you build the right analytical models for your business. These experts create deep learning, machine learning or any other artificial intelligence solutions.

The AI guru

Machine Learning Engineer

We stand for quality

You are at the right address at Florijn whether you are searching for a single professional or a whole team of specialists. We help you scale quickly and make sure to create a great data team so that you can concentrate on running your company. We stand for the quality that we provide; this is why we provide you with a dedicated project manager that you can contact if necessary.

We stand for quality

A data project is not just lines of code that lead to new insights; it's much more than that. Our primary emphasis is not the newest technology stack, nor the code that is written, but the persons for whom we work with. If you have the right specialist on board, you don't have to worry about any of the other factors.
